

2021 COURSE FOR DOCTORS

IUD Train the Trainer Program

The IUD Insertion Train the Trainer Program supports doctors to educate and assist other clinicians in IUD insertion.

This is a blended training program with an online and face-to-face workshop component. It is aimed at medical practitioners who are currently very experienced in IUD insertions and are interested in becoming a trainer for other doctors in IUD insertion.

Course Outline

This course includes an online IUD theory component which must be completed prior to a practical workshop (approx. 3 hours). The workshop will involve reviewing current guidelines on IUD insertion and training. IUD insertion trainers will go on to train another medical practitioner in IUD insertion to receive full certification from SHINE SA. Relevant guidelines and a comprehensive training log will be provided. Clinical training can be undertaken either in the trainer's practice or the trainee's practice. SHINE SA does not facilitate clinical training for this course. The IUD trainer will receive a certificate of completion and can go on to supervise the clinical component of IUD insertion under the SHINE SA training program.

Eligibility

To be eligible for this program there is a minimum requirement of 2 years' experience in IUD insertion in Australia, a minimum of 30 previous IUD insertions, maintenance of current IUD practice with at least 10 insertions per year, unconditional AHPRA registration and current medical indemnity insurance.

Accreditation/Recognition

This education is a CPD Accredited Activity under the RACGP CPD Program. This activity is accredited with ACRRM.

COST: \$895

WHERE: SHINE SA, 64c Woodville Road, Woodville
