

2022 COURSE FOR DOCTORS

Contraceptive Implant (Implanon NXT) Training for Doctors

Develop contraceptive implant insertion and removal skills and improve your understanding of counselling, assessment and complications.

The Contraceptive Implant (Implanon NXT) Training for Doctors is an interactive session, incorporating theoretical instruction and simulated practical application.

Participants will:

- complete theory training regarding counselling and assessment prior to inserting the contraceptive implant
- demonstrate practical skills with simulated training on model arms
- learn about the management of complications and bleeding changes with Long Acting Reversible Contraceptives
- develop an understanding of administration of local anaesthetic, insertion and removal procedure, and management of complications

Accreditation/Recognition

This education is a CPD Activity under the RACGP CPD Program for the 2020-2022 Triennium. This activity is accredited with ACRRM.

Enrolment Options

The Contraceptive Implant (Implanon NXT) Training has two main options for enrolment: Face-to-Face and Hybrid.

Face-to-Face Course – Onsite 2-hour theory workshop and simulation training.

Hybrid Course – Online theory module and 1 hour onsite simulation training.

COST: \$140
