IUD Insertion Training

An interactive course for doctors addressing the skills necessary for successful IUD insertion, assessment and management.

SHINE SA's IUD Insertion Training consists of an online learning module, a 2.5 hour practical workshop with experienced medical practitioners and three (3x) 3.5 hour clinical training sessions.

This training is designed for medical practitioners who are experienced in contraceptive consultations and cervical screening. Doctors with a minimum of two years of postgraduate experience in community based general practice or obstetrics and gynaecology in Australia and current registration with AHPRA as a medical practitioner can register for this training.

Participants will:

- engage with an online learning module covering IUD types, pre and post IUD insertion assessment and management of IUD complications
- develop skills in IUD insertion techniques as demonstrated on simulated models in our practical workshop
- discuss practical issues regarding IUD insertion in general practice as part of the practical workshop

Clinical training sessions are available on successful completion of the theory component (online learning module and workshop). Sessions must be commenced within 3 months of completing the theory component.

COST: **\$1,400**
