Cervical Screening Provider Course

Build the skills and confidence to provide cervical screening in your clinical practice. This interactive training program combines theory, practical skills development, and supervised clinical experience to prepare participants to become Cervical Screening Providers.

This course is ideal for health professionals working in general practice or community health settings who are required to perform cervical screening as part of their role.

Theory Component

The theory component is delivered through a self-paced online learning module and a full day face-to-face workshop. The theory component covers National Cervical Screening Program guidelines, conducting cervical screening consultations, opportunistic STI testing and clinical skills development supported by a Sexual Health Teaching Associate.

Clinical Component

To be approved as a Cervical Screening Provider, participants must complete supervised clinical training. The clinical component includes performing a minimum of five unassisted clinician-collected cervical screening tests, supervision by a SHINE SA-approved Cervical Screening Preceptor and a recommendation for provider approval from the Preceptor.

This can occur either through clinical placement at SHINE SA or with a SHINE SA approved Preceptor in your workplace.

Free Training Opportunity: Scholarships Available

SHINE SA is offering full scholarships for nurses, midwives and Aboriginal Health Practitioners to complete our Cervical Screening Provider Course – at no cost to you. Scholarships cover full course fees, travel and accommodation for participants in South Australia.

This initiative is supported by Preventive Health SA.
