

Contraceptive Implant (Implanon NXT) Training for Doctors

Develop contraceptive implant insertion and removal skills and improve your understanding of counselling, assessment and complications.

The Contraceptive Implant (Implanon NXT) Training for Doctors is an interactive session, incorporating theoretical instruction and simulated practical application.

Participants will:

- complete theory training covering counselling and assessment prior to inserting the contraceptive implant
- demonstrate practical skills with simulated training on model arms
- learn about the management of complications and bleeding changes with Long Acting Reversible Contraceptives
- develop an understanding of administration of local anaesthetic, insertion and removal procedure, and management of complications.

Enrolment Options

The Contraceptive Implant (Implanon NXT) Training has two main options for enrolment: Face-to-Face and Hybrid.

Face-to-Face Course – Onsite 2-hour theory workshop and simulation training.

Hybrid Course – Online theory module (must be completed prior to simulation training) and 1-hour onsite simulation training.

COST: \$165

WHERE: SHINE SA, 64c Woodville Road, Woodville

DATES: Face-to-Face: 6 February | 25 June | 15 October

Hybrid: 9 April | 20 August | 26 November
