

Contraceptive Implant (Implanon NXT) Training for Registered Nurses and Midwives

This practical course covers contraceptive implant insertion and removal skills as well as counselling, assessment and complications.

The Contraceptive Implant (Implanon NXT) Training for Registered Nurses and Midwives is an interactive session, incorporating theoretical instruction and simulated practical application.

Participants will:

- complete theory training regarding counselling and assessment prior to inserting the contraceptive implant
- demonstrate practical skills with simulated training on model arms
- learn about the management of complications and bleeding changes with Long Acting Reversible Contraceptives
- develop an understanding of administration of local anaesthetic, insertion and removal procedure, and management of complications.

Enrolment Options

Face-to-Face Course – Onsite 2-hour theory workshop and simulation training.

Hybrid Course – Online theory module (must be completed prior to simulation training) and 1-hour onsite simulation training.

COST: \$190

WHERE: SHINE SA, 64c Woodville Road, Woodville

DATES: Hybrid: 25 February Face-to-Face: 22 July
